REAL ESTATE MANAGEMENT FOR Dynamics 365 Business Central Moderan interface

PROPERTIES & SPACES

LEASES

UTILITIES

TO WHOM AND WHY?

The Moderan interface is for a property owner whose real estate management (contracts, objects, fees) is in Moderan software and whose ERP is Business Central (BC).

The interface is used to exchange data between Moderan and Dynamics 365 Business Central. From Moderan, customer data and real estate sales invoices are imported into Business Central, where they are finalized and sent to customers. Business Central monitors sales invoice payments and sends Moderan customer balance information.

- Moderan links each property data with the corresponding landlord company in BC – this way you have a full portfolio overview in Moderan while managing each legal entity as a separate company within your BC database.
- o Synchronize your tenant data from Moderan to BC.
- Issue Moderan invoices and book financials in BC.
- o Update customer outstanding balance from BC to Moderan.
