

# Estonian Real-Time Economy solution

for Microsoft Dynamics 365 Business Central ERP software

e-government → accounting → banking → supply chain

Discover our solutions →

The real-time economy functions like a digital ecosystem, simplifying and streamlining business processes. This allows companies to focus on their core business and reduce costs by automating administrative and support activities. The key benefit of the Real-Time Economy (RTE) is the elimination of routine work for entrepreneurs, citizens, and the state through the exchange of high-quality data in real time.

[realtimeeconomy.ee](http://realtimeeconomy.ee)

With this package, BCS Itera offers real-time economy functionality integrated with the Business Central ERP software, which enables the use of digitised data exchange with the STATE, BANKS, and other BUSINESSES. Based on many years of experience, we have identified a set of specific needs that support the efficiency and competitiveness of a company, which we have combined into this one comprehensive package. Moreover, digitised data exchange contributes to our collective efforts towards a cleaner environment.

# Real-Time Economy

for Microsoft Dynamics 365 Business Central ERP software

## e-government

### X-ROAD SERVER SERVICE

Enables communication via the X-Road interface with government agencies.

Supported services:

- EMTA - TÖR, TSD.
- Health Insurance Fund - Sick leave certificates.

### IDENTITY VERIFICATION

The solution adds two essential services to Business Central:

- Digital signature of documents
- Encryption of documents for a specific personal identification code (e.g., payslip)

Potential use cases include signing contracts or payments sent to banks directly within the system.

### COMMERCIAL REGISTER

The Estonian commercial register solution integrates the free e-Business Register information services "Company Details Service" and "E-invoice Register Service". This makes it easy to create new customers, suppliers, and contacts, and keep their data up-to-date.

### ADDRESS REGISTER

A so-called 'find as you type' solution, which greatly facilitates the filling in of address data by showing matches found in the Land Board's register of addresses immediately while typing.

## accounting

### E-INVOICES | FINBITE – UNIFIEDPOST -TELEMA - RIK

E-invoicing solutions allow you to exchange e-invoices with your business partners (in Estonia and the European Union).

### EXPENSE REPORTS - COSTPOCKET

The expense report solution enables the possibility for fully digital management of expense reports, including approval rounds, daily allowances, and digitisation of expense documents in partnership with CostPocket.com.

## banking

### LHV, SWEDBANK, SEB, LUMINOR, COOP

The real-time banking solution allows companies to obtain an overview of their bank account activity with the desired frequency and to process bank entries in real time in the ERP software. The solution includes both payments and receipts.

### FACTORING | SWEDBANK, LUMINOR

The factoring solution adds functionalities for assigning sales invoices to factoring and for related operations, including the management of receivables. The solution supports factoring contracts.

## supply chain

### EDI – TELEMA, EDISOFT, DOCURA

The module allows you to send and receive electronic documents in Telema eDoc format

### TRANSPORT MANAGEMENT - CARGOSON

The module is integrated with transport partners, provides an overview of transport providers, prices and submits all orders digitally.

BCS Itera is dedicated to supporting our clients' success. For nearly 25 years, we have helped medium-sized and large companies across various industries optimize their operations through customized ERP, BI, CRM, and HRM solutions.
