

## REAL ESTATE MANAGEMENT FOR

### Dynamics 365 Business Central

#### Bidrento Interface

This integration facilitates seamless data exchange between Bidrento's property management software and Microsoft Dynamics 365 Business Central (BC). This integration is ideal for property managers who need to manage real estate, leases, and financial data in one comprehensive system.

#### Who is it for and why?

This interface is designed for property managers using Bidrento to manage real estate portfolios (tenants, leases, properties) and Business Central for financial operations. The interface automates data exchange, improving accuracy and reducing manual tasks.

Customer data and sales invoices from Bidrento are imported into Business Central for finalization, while Business Central updates customer balances in Bidrento.

#### Key Features:

##### 1. Sync Real Estate Customers

Import real estate customers from Bidrento into Business Central, keeping data synchronized.

2. **Update Customer Information**

Automatically update customer data from Bidrento to Business Central for accurate record-keeping.

3. **Sales Invoice Synchronization**

Transfer sales invoices (including dimensions and container groups) from Bidrento to Business Central.

4. **Accounts and Sales Items**

Sync account and sales item information from Business Central to Bidrento to ensure financial consistency.

5. **Measurement Units**

Ensure measurement units are consistently aligned between Bidrento and Business Central to avoid reporting discrepancies.

---

**Data Exchange:**

- **From Bidrento to Business Central:**
  - **Real Estate Customer Data** – Import customer data from Bidrento into Business Central.
  - **Sales Invoices** – Sync invoices, including dimensions and container groups.
- **From Business Central to Bidrento:**
  - **Accounts and Sales Articles** – Synchronize accounts and sales item information.
  - **Measurement Units** – Ensure units of measurement are accurately aligned between both systems.

---

**Major Benefits:**

- **Automated Data Exchange** – Automatically sync data between Bidrento and Business Central, reducing manual work and minimizing errors.
- **Accurate Financial Reporting** – Ensure financial reports are always accurate and up-to-date with real-time data exchange.
- **Efficient Workflow** – Streamline property and financial management with consistent data across both systems.
